

January 22, 2008

Dear Mr. Webster.

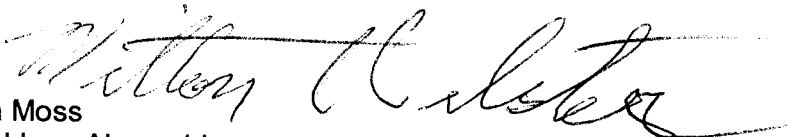

Thank you for taking the time to speak with us recently about the importance of supporting the Potomac River Generation Station. By working together on this issue, we can show our local officials it's time to end their expensive campaign against the power station.

Per our phone conversation and based upon your comments, enclosed is a letter written to Virginia Air Board. We want to make sure the letter accurately reflects your views, so **please review it before you sign it.** Andria Moss will be calling you within the next few days to ensure that you are satisfied with your letter and to answer any questions you may have. If you prefer, you can call (866) 671-7831 before then to request that changes be made to your letters or to ask any questions you may have.

If you have no changes to the letter, please sign it and use the enclosed stamped, addressed envelope to mail it to the Air Board of Supervisors. **You can help us keep track of this campaign by signing and returning the extra copy of your letter to us in the envelope provided.**

Thank you again for your time and efforts in support of this important issue. **Your voice matters to your legislators, and your action on this issue will make a difference!** As always, please feel free to contact me anytime with questions or comments.

Sincerely,

  
Andria Moss
